Election/Lack of Unity

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- | | |
|-----------|---|
| Group I | Claims 1-10, 12-14 and 16 are drawn to a protein and an immunogenic composition comprising the protein. |
| Group II | Claim 15 is drawn to a method for raising an immune response in an animal comprising administering the protein. |
| Group III | Claims 17 and 24 are drawn to an antibody and composition comprising the antibody. |
| Group IV | Claims 18-23 are drawn to a nucleic acid, a composition comprising the nucleic acid and a vector and host cell comprising the nucleic acid. |
| Group V | Claims 25(a) and 26-27 are drawn to a method of treating and preventing bacterial infection comprising administering the protein. |
| Group VI | Claims 25(b) and 26-27 are drawn to a method of treating and preventing bacterial infection comprising administering the nucleic acid. |

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of the claimed invention is the protein. The claims are anticipated by NCBI Sequence Viewer, (Accession Number Q8YAAQ1) which discloses the sequence of the protein of claim 1. The main invention in this application lacks novelty, therefore the other claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept. Inasmuch as, the technical feature does not define a contribution over the art, it is not "special" within the meaning of PCT Rule 13.2. Consequently, Groups I-VI lack unity of invention.

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the

requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
